## About This Game

Pitfall Planet is a two-player co-operative puzzle-solving adventure game that takes place on a distant, forgotten mining world. Two astrobots, recently stranded and separated from their ship, must traverse the subterranean caves of the ruined planet and overcome its many perils in the process.

In Pitfall Planet, you and your friend are equipped with the latest and greatest in astro-miner technology! Players can use their grappling hooks to pick up objects (*including each other!*) and throw them over gaps or cliffs. To collect all the ore in each level, you'll learn to master buttons, crates, lanterns, bouncy pads, rockets, tanks, and more!

One of the better co-op games I've played. Puzzle your way through levels together, collecting fuel to unlock the elevator and finding hidden gems for cosmetic unlocks. The gimmick in Pitfall Planet is that you have a grappling hook, picking up items and the other player and throwing them into lava throwing them to the other side so they can get you over gaps too.\t

I really like the graphics, the person that decides the car on the overworld is controlled by both players probably should not make these decisions. The game took about 4 hours to complete, you could get more out of it by collecting all the gems.. This game is absolutely amazing and adorable! The puzzles are not too difficult but also not too easy. I played it with my bf and I always show the game to the kids and teens in my gaming workshops and they all love it as well! It is not a very long game but worth every penny! I also bought a copy of the game on my Nintendo Switch today just because I love it so much :)
